SUBJECT INDEX

A
Abscisic acid, UV-induced cross-linking of, to binding proteins 959
Acacia karroo, comparison of phenolics in different populations of 791
Acanthaceae 1249
Acanthopanax koreanum, *ent*-kauranes from 449
Acer nikoense, bioconversion of rhododendrol by 1085
Aceraceae 1085
Acetophenone, from *Chromolaena* 795
N-Acetyl-β-D-glucosaminidase, in *Euphorbia*, stimulation of by fatty acids 985
Actinidia deliciosa, effect of inhibition of cell wall galactose loss on fruit softening in 1319
Actinidiaceae 1319
Adina rubella, triterpenoid glycosides from 1241
Aeonium, systematic and evolutionary significance of exudate flavonoids in 805
Aeschynomene indica, trigonelline as leaf-closing factor in 817
Agaricus bisporus, comparison of native melanin from with analogues 49
Agavaceae 949
Agrostophyllum callosum, stilbenoids from 649
Ailanthus grandis, steroids and terpenoids from 1403
Albizzia lebbek, macrocyclic spermine alkaloids from 247
Algae 145, 351, 373, 1017, 1257, 1287
  from Qatar, sterol composition of 373
Alkaloid
  glycosides, steroid, from *Solanum* 1475
  N-oxides, epimeric, from *Thalictrum* 683
Alkaloids
  amide, from *Piper*, synthesis of 731
  benzylisoquinoline, from *Ocotea* 815
  cyclopeptide, from *Discaria* 431
  cytotoxic, from *Nothapodytes* stems 383
  dehydropleiocarpine, from *Kopsia* 469
  from *Brucea* 911
  from *Erythrina* seeds 677
  from *Galanthus* 1229
  from *Incarvillea* 1485
  from *Lycoris* 477
  from *Peschiera* stem bark and leaves 1223
  From *Picea* 1387
  2-indolinone, from *Thomandersia* 1249
  indoloquinoline, from *Cryptolepis* 735
  isoquinoline,
    from *Ancistrocladus* 701
    from *Arcangelisia* stems 439
    from *Corydalis* roots 435
  norditerpenoid, from *Delphinium* 1459, 1467
  phenanthroindolizidine, from *Tylophora* 695
  piperidine, from *Pinus* seedlings 705
  pyrrolizidine,
    from *Cynoglossum*, distribution, biosynthesis and turnover 287
    from *Heliotropium* 473
  2-quinolone, from *Glycosmis* leaves 1453
  4-quinolone, from *Boronia* 801
  sesquiterpene, from *Tripterigium* 1219
  spermidine, from *Oncinotis* 689
  spermine, macrocyclic, from *Albizzia* seeds 247
  terpenoid indole, effect of enzyme levels on biosynthesis of, in *Tabernaemontana* 341
  tropane, toxic, from *Convolvulus* 301
Allelopathic glycoside, from germinated seed exudates 1031
Amaryllidaceae 477, 1229
Amidosulfoxides, from *Glycosmis* leaves 1453
1-Aminocyclopropane-1-carboxylate oxidase,
  CO_2-activated, effect of pH on activity of in apples 751
  from banana fruit 15
Anabaena cylindrica, biosynthesis of heterocyst glycolipids in 771
Anacardiaceae 405, 537
Ancistrocladaceae 701
Ancistrocladus tectorius, isoquinoline alkaloids from 701
Anemoclema glaucifolium, triterpenoid glycosides from 1175
Angelica pubesence, platelet aggregation inhibitory coumarins from 1099
Annonaceae 443, 447
Anthocyanidin
  3-glucoside succinyltransferase, in *Centaurea* flowers 311
  triglycoside, from *Linum* petals 243
Anthocyanins, acylated,
  from *Hyacinthus* 1437
  from *Lobelia* purple-red flowers 423
Anthranilate synthase, in micro-organisms and plants 263
Anthraquinone glycoside, dimeric, from *Cassia* 717
Anthraquinones,
  from *Rhamnus* fruits 1411
  from *Rumex* 1211
Antiallergic dimeric prenylbenzoquinones, from *Ehretia* 105
Antibodies, monoclonal, against 11S storage protein from peas 969
Antifungal
  flavanones, from *Eriosema* 1049
  hydroxymethyl-phenols, from *Verticillium* 1043
  melampolide, from *Smallanthus* 845
  phenylpropanoids, from *Cosmos* roots 409
Anti-platelet aggregation constituents, from *Zanthoxylum* 1091
Antirrhinum, antirrhinoside biosynthesis in 549
Antiviral β-D-glucans, from fungi, structure-activity relationships of 57
Antrodia cinnamomea, sesquiterpene lactone, phenyl and biphenyl from 613
Aphid infestation, of barley, causing changes to ferulic acid and lipid content 1023
Apium graveolens, phytoalexin from, associated with pathogen resistance 1347
Apocynaceae 171, 341, 469, 689, 1223
Aralia armata, triterpenoid glucuronide saponins from 179
A. bipinnata,
  lignans from 899
  phenylpropanoids from 825
Araliaceae 179, 449, 825, 899
Araucaria araucana, cationic peroxidases from 29
Araucariaceae 29

Arcangelisia gusanlung, isoquinoline alkaloids from 439
Artocarpus heterophyllus, flavonoids from 1447
Asclepiadaceae 199, 395, 695, 735
Ascorbate, reactivity of, with different redox states of leghaemoglobin 1281
Aspergillus niger, biotransformation of the monoterpenoid, rose oxide, by 85
Aster batangensis, triterpene saponins from 875
Azaphilone, from *Talaromyces* 719

B
Bacteria 531, 631, 757, 771
halophilic, dodecaene C_{50}-carotenoids from 631
Bartramia stricta, triflavonoid from 465
Benzoic acids, chemiluminescence of, by Fenton reaction 225
Berberidaceae 231
Beta vulgaris, enzymatic analysis of pectin from 821
Bianthraquinone glycoside, from *Cassia* 717
Bifurcaria bifurcata, furanoditerpenes from 145
Bignoniaceae 235, 1485
Biogenic emissions, from wheat and lettuce, effect of crop development on 1351
Biologically active
alkaloids,
cytotoxic, from *Nothapodytes* 383
toxic, from *Convolvulus* 301
bisbibenzyl, with antiplatelet activity, from *Reboulia* 91
coumarins, inhibiting platelet aggregation,
from *Angelica* 1099
from *Zanthoxylum* 1091
dibenzofurans, phytoalexins, from Rosaceae sapwood 1033, 1039
flavanones, antifungal, from *Eriosema* 1049
β-D-glucans, from fungi, inhibiting initiation of virus infections in *Nicotiana* 57
glucoside, allelopathic, from germinated seed exudates 1031
hydroxymethyl-phenols, antifungal, from *Verticillium* 1043
phenylpropanoids, antifungal, from *Cosmos* roots 409
prenylbenzoquinones, antiallergic, from *Ehretia* 105
psoralen precursor, phytoalexin, from celery 1347
saponins,
inhibiting c-AMP phosphodiesterase, from *Dichelostemma* 1103
molluscicidal, from *Catunaregam* 63
sesquiterpene lactones, antifungal, from *Smallanthus* 845
sesquiterpenoids, phytoalexins, from cotton 531
triterpenoids,
cytotoxic, from *Nerium* 171
inhibiting secreted phospholipase A_2, from *Schinus* 537
Biosynthesis,
of acyclic homoterpenes, in leaves damaged by herbivores 785
of alkaloids,
in *Tabernaemontana* cell lines 341
pyrrolizidine, in *Cynoglossum* 287
tropane, acylated, in *Datura* 315
of anthocyanins, acylated, in *Centaurea* 311
of aromatic amino acids, in higher plants 737
of caffeine, in *Coffea* 1363
of cyanogenic glucosides, in cassava roots 323
of cyclobrassinin, in Japanese radish 587
of gibberellin A_1, in the fungus *Phaeosphaeria* 305
of glycolipids, in *Anabaena* heterocyst 771
of iridoids, in *Antirrhinum* 549
of lanosterol, in *Euphorbia* 333
of lignin, possible regulatory role of peroxide generation in 71
of *cis*-polyisoprenes, initiation of 779
of rishitin, in tomato cultures 69
of sesquiterpenoid phytoalexins, in *Gossypium* 327, 553
of sulphoquinovosyldiacylglycerol, in pea and lettuce chloroplasts 1071
of xanthofusin, in *Fusicoccum* 1359
Biotransformation,
of (−)-α-bisabolol, by *Glomerella* 1077
of (+)- and (−)-camphorquinones, by fungi 569
of 8-epicedrol, by *Cephalosporium* 1081
of lignans, in *Spodoptera* 1027
of (−)-nopol, by *Glomerella* 337
of rhododendrol, by *Acer* 1085
of rose oxide, by *Aspergillus* 85
Biphenyl, from *Antrodia* 613
(−)-α-Bisabolol, biotransformation of by *Glomerella* 1077
Bisbibenzyls, cyclic, from *Reboulia* 91
Bis-iridoid glucosides, from *Lonicera* 111
Boraginaceae 105, 287, 473, 659
Boronia algida, alkaloid, coumarins and triterpene from 801
Boswellia serrata, triterpenoids from 453
Brassica campestris, effect of salt stress on polyamine metabolism in 283
B. juncea, effect of zinc on free radicals and proline in 45
Bredemeyera floribunda, pentaoxygenated xanthones from 1433
Bromeliaceae 665
Brucea mollis, alkaloids and quassinoids from 911
Bryonia, flavone *C*-glycosides from 727
Burseraceae 453
Byrsonima crassifolia, proanthocyanidins with (+)-epicatechin units from 635

C
δ-Cadinene, enzymatic formation of in cotton extracts 327
(+)-δ-Cadinene, as a product of sesquiterpene cyclase activity in cotton 553
Caffeine,
biosynthesis of, in *Coffea* 1363
localization of, in *Paullinia* seed in relation to dispersal 1063
Cajanus cajan, effect of zinc on free radicals and proline in 45
Callicarpa macrophylla, NMR chemical shift correlations in 16,17-dihydroxykauranoids from 929
Calluna vulgaris, 2,3-dihydroflavonoid glucosides from 427
Camphorquinones, fungal biotransformation of 569
Cannabinoid, from *Cannabis* 457
Cannabis sativa, cannabinoid from 457
Capparaceae 175
Caprifoliaceae 111
Capsicum annuum, effect of Ti (IV) on Fe activity in 977
Caput nigri, cucurbitacin glycosides from 205, 209
Carnitine acyltransferase, from mung bean mitochondria 39
C_{50}-Carotenoids, dodecaene, from halophilic bacteria 631
Caryodaphnosis tonkinensis, polar eupomatenoids from 213
Caryophyllaceae 709
(+)-β-Caryophyllene, in liverwort essential oils, identification of by enantioselective GC 1119
Cassia torosa, bianthraquinone glycoside from 717
Catunaregam nilotica, molluscicidal saponins from 63
Celastraceae 1153, 1159, 1219
Centaurea cyanus, anthocyanidin 3-glucoside succinyltransferase in 311
Cephalaria transsylvanica, triterpenoid glycosides from 1171
Cephalosporium aphidicola, biotransformation of 8-epicedrol by 1081

Chalcone synthase, in *Marchantia* 1007
Chemiluminescence, of phenolics by Fenton reaction 225
Chemotaxonomic studies,
of alkaloids,
benzylisoquinoline, in *Ocotea* 815
in *Picea* 1387
4-quinolone, in *Boronia* 801
of fatty acids, in marine microalgae 351
of flavonoids, exudate, in *Aeonium* 805
of furanones, iridoid and phenylpropanoid glycosides, in Rubiaceae 375
of hydroxycoumarins, in *Tetraphis* 379
of marine brown algae of family Cystoseiraceae 1257
of phenolics, in heartwood of *Acacia karroo* subspecies 791
of polyprenol acetates of the betulaprenol type, in *Murraya* 1383
of polysaccharides, in *Strychnos* seeds 1377
of secoiridoids and sesquiterpenes, in *Poraqueiba* 835
of sesquiterpene lactones,
in *Helianthus* hybrid 367
in *Urolepis* 795
of sesquiterpenoids,
in *Lactarius* species 363
in *Reboulia*, infraspecific variation of 91
of sterols, from Qatar algae 373
of terpenoids, in liverworts 99
of trisubstituted hydroxycinnamoyl spermidines, in *Quercus* 1371
of triterpene methyl ethers, from Palmae epicuticular waxes 1381
of volatiles, in *Pinus* needles 357
Chenopodiaceae 821
Chloranthaceae 121
Chloranthus japonicus, sesquiterpene dimers from 121
Chlorophyll-*a* catabolism, ethylene-induced, in radish cotelydons, involvement of superoxide anion in 527
Chlorophyta 373
Chondrus crispus, involvement of oxidized-semiquinone couple in photoreduction of flavodoxins from 1287
Chromolaena arnottiana, flavonoids and acetophenone from 795
Chrozophora obliqua, dolabellane diterpenes from 151
Chrysophyta 1017
Chymotrypsin inhibitor, from *Schizolobium* 521
Cinnamic acids, chemiluminescence of, by Fenton reaction 225
Cirsium japonicum, flavone diglycoside from 261
Citrus limon, limonoid glucoside β-glucosidase activity in seeds of 1305
Cleome amblyocarpa, dammarane triterpenes from 175
Cocos nucifera, lysophosphatidic acid acyltransferase from 989
Coelogyne flaccida, stilbenoids from 649
C. ochracea, pyrene from 1429
Coffea arabica, caffeine biosynthesis in 1363
Columbianetin, role of, in resistance of celery to pathogens 1347
Compositae 127, 133, 261, 311, 367, 387, 409, 609, 775, 795, 845, 853, 875, 1071, 1127, 1133, 1201, 1351, 1395, 1479, 1489
Convolvulaceae 301, 981, 1001
Convolvulus arvensis, toxic tropane alkaloids from 301
Conyza linearis, diterpene acetylxylosides from 1489
Copper-amine oxidases, in plants 1
Corydalis decumbens, isoquinoline alkaloids from 435
Cosmos caudatus, antifungal phenylpropanoids from 409
Coumarins,
from *Boronia* 801
from *Zanthoxylum* 1091
highly oxygenated, from *Pelargonium* 1181
platelet aggregation inhibitory, from *Angelica* 1099
tri- and tetrahydroxylated, from *Tetraphis* 379
Crassulaceae 805
Crataegus, dibenzofuran phytoalexins from 1033
Crepis pyrenaica, sesquiterpene lactone glycosides from 1395
Cruciferae 45, 283, 481, 527, 581, 587, 919, 1031, 1301
Cryptolepis sanguinolenta, indoloquinoline alkaloid from 735
Cryptomeria japonica, sesquiterpenes from 603
Cucurbitaceae 205, 209, 591, 727
Cucurbitacin glycosides, from *Caput* 205, 209
Cunila spicata linalool and cineole glucosides from 1115
Cupressaceae 391
Cuscuta reflexa, starch phosphorylase from 1001
Cyanogenic glucosides, biosynthesis of, in cassava roots 323
Cyanophyta 771
Cyathocalyx zeylanica, clerodane diterpenoids from 443
Cyclobrassinin biosynthesis, in *Raphanus*, non-involvement of methoxybrassinin in 587
Cyclohexylethanoids, from *Millingtonia* 235
Cynanchum caudatum, steroidal glycosides from 199
Cynoglossum officinale, distribution, biosynthesis and turnover of pyrrolizidine alkaloids from 287
Cysteine protease, from *Phytolacca*, comparison of with papain 997
Cystoseiraceae, chemistry and chemotaxonomy of 1257
Cytotoxic
alkaloids and coumarin, from *Nothapodytes* 383
triterpenoids, from *Nerium* 171

D

Datura stramonium, tigloyl-CoA: pseudotropine acyl transferase from 315
Daucus carota,
dimer as active form of 6-hydroxymellein synthase in 515
polyphenoloxidase from 33
Delphinium, norditerpenoid alkaloids from 1459, 1467
N-Demethyl budmunchiamines, from *Albizzia* seeds 247
Diamine oxidase, from pea, loss of activity of by 1,3-diaminopropane 489
1,3-Diaminopropane, as suicide substrate for pea diamine oxidase 489
Dibenzofuran phytoalexins, from Rosaceae 1033, 1039
Dichelostemma multiflorum, c-AMP phosphodiesterase inhibitory steroidal saponins from 1103
3,4-Dichloroalinine *N*-glucosyl- and *N*-malonyl-transferase, activities of in soybean and wheat 81
2,3-Dihydroflavonoid glucosides, from *Calluna* 427
9,10-Dihydrophenanthrene, from *Epimedium* 231
Diniconazole, effect of an sterol composition in *Trigonella* 883
Dipsacaceae 1171
Discaria febrifuga, cyclopeptide alkaloids from 431
Diterpenoid
acetylxylosides, from *Conyza* exudate 1489
dilactone glycosides, from *Podocarpus* 1143
glycoside, *ent*-kaurane, from *Stevia* 1133
lactones, from *Gynocardia* roots 1399
Diterpenoids,
clerodane,
from *Cyathocalyx* 443
from *Polyalthia* 447
dihydroxykaurenoid, from *Callicarpa*, NMR chemical shift correlation in 929
dolabellane, from *Chrozophora* 151
from *Jamesoniella* cultures 859
from *Salvia* 139, 931
furano-, from *Bifurcaria* 145
ent-kaurane, from *Acanthopanax* 449
ent-kaurene, accumulation of in paclobutrazol-treated wheat seedlings 11

labdane,
from *Symphyogyna* 99
from *Urolepis* 795
nor-, from *Juniperus* 391
rearranged abietane, from *Zhumeria* 163
Dorstenia contrajerva, structure revision of furanocoumarin from 645
Dracaena cinnabari, triflavonoid from resin of 949
Duranta erecta, iridoid glucosides from 829

E
Ecdysteroids, from *Penstemon* 941
Ehretia microphylla, antiallergic dimeric prenylbenzoquinones from 105
E. ovalifolia, phenolic glucosides and lignans from 659
Elaeis guinensis, lipids of developing kernel endosperm of 1325
Ellagitannins,
from *Phyllanthus* 217
from *Quercus*, structure simulation of 1193
Emmotins, sesquiterpenoid, from *Poraqueiba* 835
Emodinanthrone rhamnoside acetates, from *Rhamnus* 1411
Endo-*N*-acetyl-β-D-glucosamidase, activities of during radish germination 481
Enterospermum pruinosum, triterpenoid diglucoside from 251
Enzymes,
1-aminocyclopropane-1-carboxylate oxidase, from banana fruit 15
carnitine acytransferase, from *Vigna* mitochondria 39
chalcone synthase, from *Marchantia* 1007
cysteine protease, from *Phytolacca*, comparison of with papain 997
diamine oxidase, from *Pisum*, loss of activity of by 1,3-diaminopropane 489
β-1,3-glucanase isozymes, from *Hevea* latex 505
glutamate dehydrogenase, in maize, ammonium ion-dependent isomerization of 495
6-hydroxymellein synthase, dimer as active form of 515
limonoid glucoside β-glucosidase, from lemon seeds 1305
lysophosphatidic acid transferase, from immature coconut endosperm 989
myrosinase, from *Raphanus* roots 1301
pectinesterase activity, in heated Golden Delicious apples 491
pectinesterase forms, of tomato, kinetic properties of 277
peroxidases,
acidic, from sweet potato cultures 981
cationic, from *Araucaria* seed cell walls 29
phosphodiesterase, from *Mentha* cultured cells 1013
polyphenoloxidase, from carrot 33
protein deglycosylation enzyme activities, during *Raphanus* germination 481
proteinase, extracellular, from *Pseudomonas* 757
starch phosphorylase, from *Cuscuta* filaments 1001
tetrahydrofolate dehydrogenase:cyclohydrolase, from *Pisum* 1309
8-Epicedrol, biotransformation of, by *Cephalosporium* 1081
Epimedium koreanum, 9,10-dihydrophenanthrene from 231
Equisteaceae 915
Equisetum, styrylpyrone glucosides from 915
Ericaceae 427, 463
Eriosema tuberosum, antifungal polyphenols from 1049
Erythrina senegalensis, isoflavones and alkaloids from 677
Euphorbia characias, stimulation of latex enzymes of 985
E. lathyris, lanosterol biosynthesis in 333
Euphorbiaceae 151, 217, 323, 333, 505, 985
Eupomatenoids, polar, from *Caryodaphnosis* 213

F
Fagaceae 1193, 1371
Fatty acid
composition, of marine microalgae 351
synthesis, in peas, effect of thiolactomycin on 511
Ferulic acid
changes, in aphid-infected barley 1023
esters, *in vitro* peroxidase-catalyzed oxidation of 1293
Flacourtiaceae 1399, 1415
Flavanoid glucosides, from *Calluna* 427
Flavanones, antifungal, from *Eriosema* 1049
Flavodoxins, from algae, involvement of oxidized-semiquinone couple in photoreduction of 1287
Flavone diglycoside, from *Cirsium* 261
Flavone *C*-glycosides, from *Bryonia* 727
Flavones,
5,8-dihydroxy-6,7-dimethoxy-, synthesis of 1201
O-methylated, revised structures of 1201
Flavonoid
glycosides,
from *Gonocaryum* 115
from *Rumex* 1211
production, in cell cultures and whole plant of *Maclura* 575
Flavonoids,
chemiluminescence of, by Fenton reaction 225
exudate, in *Aeonium* species, systematic significance of 805
from *Artocarpus* 1447
from *Glycosmis* leaves 1453
from *Urolepis* and *Chromolaena* 795
trimeric, from dragon's blood 949
Flavonol glycosides,
acylated, from pea shoots 1443
from *Ocotea* 815
from *Zanthoxylum* pericarps 723
Flavonol, from *Rhododendron* 463
Free radicals, in *Brassica* and *Cajanus*, effect of zinc on 45
Frullania, oleanane triterpene ester from 99
Fungi 49, 57, 85, 293, 305, 337, 363, 569, 613, 719, 1043, 1077, 1081, 1165, 1359
Furanocoumarin, from *Dorstenia*, structure revision of 645
Furanone glucoside, from Rubiaceae 375
Fusicoccum, biosynthesis of xanthofusin from 1359

G
Galactose loss, from cell walls, effect of inhibition of on kiwifruit ripening 1319
Galanthus elwesii, alkaloids from 1229
Garcinia mangostana, xanthone from 943
G. subelliptica, prenylated xanthones from 945
Gastrodia elata, 2,4-*bis*(4-hydroxybenzyl)phenol from 1247
Geraniaceae 1181
Gibberellin A_1 biosynthesis, plant-like, in *Phaeosphaeria* 305
Glomerella cingulata,
biotransformation of (−)-α-bisabolol by 1077
biotransformation of (−)-nopol by 337
β-1,3-Glucanase isozymes, from rubber latex 505
β-D-Glucans, fungal, inhibition of virus infection initiation by, in *Nicotiana* 57
β-Glucosidase, of limonoid glucoside, activity of in lemon seeds 1305
Glutamate dehydroxygenase, from maize, ammonium ion-dependent isomerization of 495
Glycine max,
3,4-dichloroaniline *N*-glucosyl- and *N*-malonyltransferase activity in 81

reactivity of ascorbate with redox states of leghaemoglobin from 1281
Glycolipids, biosynthesis of, in *Anabaena* heterocyst 771
Glycosmis citrifolia, flavonoids, amidosulfoxides and alkaloid from 1453
Gonocaryum calleryanum, secoiridoid and flavonoid glycosides from 115
Gossypium barbadense, enzymatic formation of δ-cadinene in 327
G. hirsutum,
cyclase activity in, catalyzing biosynthesis of sesquiterpene phytoalexins 553
induction of cadinane sesquiterpenes in, by bacterial inoculation 531
Gramineae 11, 81, 495, 1023, 1351
Guibourtia tessmannii, stilbene glycosides from 895
Guttiferae 903, 943, 945
Gynocardia odorata, diterpenoid lactones from 1399

H
Hacquetia epipactis, triterpene saponins from 195
Haplophyllum ptilostylum, prenylated lignans from 417
Helianthus, effect of interspecific hybridization on sesquiterpene lactones of 367
Heliotropium scabrum, pyrrolizidine ester alkaloid from 473
Hemiterpene glucoside, from *Lamium* 923
Hepaticae 91, 99, 859, 1007, 1119
Hevea brasiliensis, β-1,3-glucanase isozymes from latex of 505
Homalium longifolium, 2,5-dihydroxybenzyl alcohol glucosides from 1415
Homoterpenes, acyclic, biosynthesis of 785
Hordeum vulgare,
ferulic acid and lipid changes in, by aphid infestation 1023
ent-kaurene accumulation in paclobutrazol-treated seedlings of 11
Hyacinthus orientalis, acylated anthocyanins from 1437
Hydroquinone diglycoside, from *Mitracarpus* 1483
Hydroxybenzyl alcohol glucosides, from *Homalium* 1415
Hydroxycinnamic acid amides, from *Quercus* pollen 1371
6-Hydroxymellein synthase, in carrot cell extracts, dimer as active form of 515
3-Hydroxy-3-methylglutaryl coenzyme A reductase, in lettuce seedlings 775
Hydroxymethyl-phenols, antifungal, from *Verticillium* 1043
4-(*p*-Hydroxyphenyl)-(2*S*)-butanol, from *Taxus* needles 259
Hymenoxys, sesquiterpene lactones from 1127
Hypericum patulum, substituted xanthone from 903

I
Icacinaceae 115, 383, 835
Incarvillea sinensis, alkaloids from 1485
Ipomoea batatas, acidic peroxidases from 981
Iridoid glycosides,
from *Duranta* 829
from *Kickxia* 925
from *Lonicera* 111
from *Penstemon* 1391
from *Rubiaceae* 375
Iridoids,
biosynthesis of, in *Antirrhinum* 549
glucose mono- and diesters of, from *Linaria* 1111
Isoflavones,
from *Erythrina* stem bark 677
from *Laburnum* pods 673
pyrano- and dihydrofurano-, from *Millettia* 1215
Isoflavonoids, from *Sophora* roots 667, 907

J
Jamesoniella autumnalis, diterpenoids from cultures of 859
Juniperus chinensis, norditerpenes from 391

K
Kadsura japonica, dibenzocyclooctadiene lignans from 1187
ent-Kaurenes, accumulation of in paclobutrazol-treated cereal seedlings 11
Kickxia, iridoid glucosides from 925
Kopsia profunda, dehydropleiocarpine alkaloids from 469
Krameria grayi, neolignans and nor-neolignans from 413
Krameriaceae 413

L
Labiatae 139, 163, 617, 715, 923, 931, 1013, 1115, 1201
Laburnum anagyroides, isoflavones from 673
Lactarius, chemotaxonomic evidence for species division in 363
Lactuca sativa,
biosynthesis of sulphoquinovosyldiacylglycerol by chloroplasts of 1071
effect of crop development on biogenic emissions from 1351
with red spot disorder, phytoalexin accumulation in 775
Lamium album, hemiterpene glucoside from 923
Lanosterol biosynthesis, in *Euphorbia* 333
Lauraceae 213, 815, 849
Leghaemoglobin, from soybean, reactivity of ascorbate with different redox states of 1281
Leguminosae 21, 39, 45, 81, 247, 489, 511, 521, 667, 673, 677, 717, 791, 817, 883, 895, 907, 969, 1049, 1071, 1215, 1281, 1309, 1335, 1443
Lepidimoide, from exudates of germinated seeds 1031
Lepidium sativum, allelopathic glycoside from 1031
Lettucenin A accumulation, in lettuce seedlings with red spot disorder 775
Lignans,
biotransformation of, by *Spodoptera* 1027
dibenzocyclooctadiene, from *Kadsura* 1187
from *Aralia* wood 899
from *Ehretia* 659
from *Piper* 655
prenylated, from *Haplophyllum* 417
Lignin biosynthesis, in *Pinus*, possible regulatory role of H_2O_2 in 71
Liliaceae 1103, 1437
Limonoid glucoside β-glucosidase, activity of in lemon seeds 1305
Limonoids, from *Trichilia* 621
Linaceae 243
Linaria japonica, iridoid ester of D-glucopyranose from 1111
Linum grandiflorum, anthocyanidin triglycoside from 243
Lipase activity, in *Euphorbia*, stimulation of by fatty acids 985
Lipid
changes,
during development and ripening of peach fruits 1329
in aphid-infested barley 1023
composition,
of $CaCl_2$-infiltrated apples 763
of cytosolic particles from senescing bean cotyledons 1335
of *Skeletonema* 1017
Lipids,
from *Stellaria* 709
in developing oil palm kernel endosperm 1325
Lobelia erinus, acylated anthocyanin from 423

Lobeliaceae 423
Lonicera caerulea, bis-iridoid glucosides from 111
Lychnophora rupestris, sesquiterpenes lactones from 387
Lycopersicon esculentum,
kinetic properties of pectinesterase forms of 277
rishitin biosynthesis in cultures of 69
Lycoris sanguinea, alkaloids from 477
Lysophosphatidic acid acyltransferase, from immature coconut endosperm 989

M
Maclura pomifera, flavonoids in cell cultures and whole plants of 575
Magnoliaceae 839
Malpighiaceae 635
Malus domestica,
effect of pH on CO_2-activated 1-aminocyclopropane-1-carboxylate oxidase activity in 751
lipid composition of $CaCl_2$-infiltrated fruits of 763
pectin methyl esterase activity in 491
Malvaceae 327, 531, 553
Manihot esculenta, biosynthesis of cyanogenic glucosides in 323
Marchantia polymorpha, chalcone synthase in 1007
Marine microalgae, fatty acid composition of 351
Mazus miquelii, triterpene saponins from 185
Medicagenic acid saponins, from *Aster* 875
Melanin, from *Agaricus*, Fourier-transform infrared spectroscopy of 49
Melanoselinum decipiens, eudesmanolides from 1123
Meliaceae 167, 621
Menispermaceae 439, 1139
Mentha arvensis, phosphodiesterase I in cultured cells of 1013
Mespilus germanica, dibenzofuran phytoalexins from 1039
Michelia champaca, sesquiterpene lactones from 839
Millettia thonningii, isoflavones from 1215
Millingtonia hortensis, cyclohexylethanoids from 235
Mimusops elengi, lupene triterpene from 255
Mitracarpus scaber, pentalongin hydroquinone diglycoside from 1483
Molluscicidal saponins, from *Catunaregam* 63
Monoterpenoid glucosides, from *Cunila* 1115
Monoterpenoids,
biotransformation of,
by *Aspergillus* 85
by *Glomerella* 337
Moraceae 457, 575, 645, 1447
Murraya exotica, long-chain polyprenyl acetates from 1383
Musa, 1-aminocyclopropane-1-carboxylate oxidase from 15
Musaceae 15
Musci 379, 465
Mussaenda pubescens, triterpenoid saponins from 191
Myrosinase, from radish roots 1301

N
Neoalsomitra integrifolia, dammarane glycosides from 591
Neolignans,
from *Krameria* roots 413
from *Piper* 655
Nerium oleander, cytotoxic pentacyclic triterpenoids from 171
Neurolaena lobata, sesquiterpene lactones from 133
Nicotiana tabacum, inhibition of virus infection initiation in, by fungal β-D-glucans 57
(−)-Nopol, biotransformation of, by *Glomerella* 337
Norditerpene furan glycosides, from *Tinospora* 1139
Nothapodytes foetida, cytotoxic alkaloids and coumarin from 383

O
Ochrolone, from *Coelogyne* 1429
Ocotea corymbosa, rearranged eudesmane sesquiterpenoids from 849
O. vellosiana, benzylisoquinoline alkaloids and flavonols from 815
Oncinotis tenuiloba, spermidine alkaloids from 689
Orbignya phalerata, triterpene methyl ethers from wax of 1381
Orchidaceae 649, 1247, 1429

P
Paclobutrazol, *ent*-kaurene accumulation in wheat seedlings treated with 11
Palmae 989, 1325, 1381
Papaveraceae 435
Paullinia cupana, role of caffeine in seed dispersal of 1063
Pectin, from sugar-beet, enzymatic analysis of 821
Pectin methylesterase activity, in heated Golden Delicious apples 491
Pectinesterases, from tomato, kinetic properties of 277
Pelargonium sidoides, highly oxygenated coumarins from 1181
Penstemon crandallii, verbascosides and iridoid glycosides from 1391
P. venustus, ecdysteroids from 941
Pentalongin hydroquinone diglycoside, from *Mitracarpus* 1483
Peptide-N^4-(*N*-acetyl-glucosaminyl) asparagine amidase, activities of during radish germination 481
Peroxidase-catalyzed oxidation, of ferulic acid esters 1293
Peroxidases,
acidic, from *Ipomoea* suspension cultures 981
cationic, from *Araucaria* seed cell walls 29
Peschiera buchtieni, alkaloids from 1223
Phaeophyta 145, 373, 1257
Phaeosphaeria, plant-like gibberellin A_1 biosynthesis in 305
Phaseolus vulgaris,
lipid composition of cytosolic particles from 1335
regulation of enzymes of UDP-sugar metabolism during differentiation of 21
Phenol, 2,4-*bis*(4-hydroxybenzyl)-, from *Gastrodia* 1247
Phenolic glycosides,
from *Ehretia* 659
from *Homalium* 1415
from *Semecarpus* seeds 405
Phenolics,
from *Acacia* heartwood of different localities 791
from *Picea* root bark 1423
from *Taxus* needles 259
Phenyl derivatives, from *Antrodia* 613
Phenylbutanoid monomers, from *Zingiber* rhizomes 459
Phenylethanoid glycosides, from *Penstemon* 1391
Phenylpropanoid glycosides, from Rubiaceae 375
Phenylpropanoids,
antifungal, from *Cosmos* roots 409
from *Aralia* 825
Phosphodiesterase I, in *Mentha* cultured cells 1013
Phospholipase A_2, triterpenoid inhibitors of, from *Schinus* berries 537
Photinia davidiana, dibenzofuran phytoalexins from 1033
Phyllanthus amarus, ellagitannins from 217
Physalis minima, 13,14-seco-16,24-cyclosteroid from 1245
Phytoalexin accumulation, in lettuce seedlings with red spot disorder 775
Phytoalexins,
associated with pathogen resistance of celery during storage 1347
dibenzofuran, from Rosaceae sapwood 1033, 1039

sesquiterpenoid,
biosynthesis of in cotton 553
enzymatic formation of in cotton 327
induced in cotton by bacterial inoculation 531
Phytolacca, triterpenoid saponins from 625
P. americana, comparison of cysteine protease from, with papain 997
Phytolaccaceae 625, 997
Picea abies, phenolics from 1423
P. breweriana, alkaloids from 1387
Pinaceae 71, 357, 705, 1287, 1423
Pinidine biosynthesis, in *Pinus* 705
Pinus, volatiles from needles of 357
P. ponderosa, piperidine alkaloids and pinidine biosynthesis in 705
P. taeda, possible role of H_2O_2 in lignin biosynthesis in 71
Piper clarkii, neolignans and lignan from 655
P. sarmentosum, synthesis of amide alkaloid from 731
Piperaceae 655, 731
Pisum sativum,
acylated flavonol glycosides from 1443
biosynthesis of sulphoquinovosyldiacylglycerol by chloroplasts of 1071
1,3-diaminopropane as suicide substrate for diamine oxidase from 489
effect of thiolactomycin on fatty acid synthesis in 511
monoclonal antibodies against 11S storage protein from 969
tetrahydrofolate dehydrogenase:cyclohydrolase protein from 1309
Podocarpaceae 1143
Podocarpus nagi, diterpene dilactone glycosides from 1143
Polyalthia cheliensis, clerodane diterpenes from 447
Polyamine metabolism, in *Brassica*, effect of salt stress on 283
Polygalaceae 1433
Polygonaceae 1211
cis-Polyisoprenes, initiation of biosynthesis of 779
Polyketide biosynthetic enzyme, in carrot cells, dimer as active form of 515
Polyphenoloxidase, from carrot cells 33
Polyphenols, antifungal, from *Eriosema* 1049
Polyprenyl acetates, long-chain, from *Murraya* 1383
Polysaccharides, from *Strychnos* seeds 1377
Poraqueiba, sesquiterpenoid emmotins, triterpenes, lignans and secoiridoids from 835
Poria cocos, surface triterpenes from 1165
Porphyra umbilicalis, photoreduction of flavodoxins from 1287
Pregnane glycosides, from *Stapelia* 395
Prenylbenzoquinones, dimeric, antiallergic, from *Ehretia* 105
Proanthocyanins, with (+)-epicatechin units, from *Byrsonima* bark 635
Proline, in *Brassica* and *Cajanus*, effect of zinc on 45
Protein, exhibiting dehydrogenase:cyclohydrolase activities, from *Pisum* 1309
Proteinase, extracellular, from *Pseudomonas* 757
Prunus persica, lipid changes during fruit development in 1329
Pseudomonas tolaasii, extracellular proteinase from 757
Pulsatilla patens, saponin from 937
Pyracantha coccinea, dibenzofuran phytoalexins from 1033
Pyrene, from *Coelogyne* 1429

Q
Quassinoids, from *Brucea* 911
Quercus dentata, trisubstituted hydroxycinnamic acid amides from 1371
Q. robur, structure simulation of ellagitannins from 1193

R
Ranunculaceae 683, 937, 1175, 1459, 1467
Raphanus sativus,
involvement of superoxide anion in ethylene-induced chlorophyll *a* catabolism in 527
myrosinase from 1301
non-involvement of methoxybrassinin in cyclobrassinin biosynthesis in 587
protein deglycosylation enzyme activities during germination of 481
sulphur-containing stress metabolites from 581
Reboulia hemisphaerica, sesquiterpenoids and cyclic bisbibenzyls from 91
Rhamnaceae 431, 1411
Rhamnus prinoides, anthraquinones from 1411
Rhododendrol, bioconversion of by *Acer* 1085
Rhododendron ellipticum, methylated flavonol from 463
Rhodophyta 373, 1287
Rishitin biosynthesis, in tomato cultures 69
Rorippa indica, sulphonylalkyl amine from 919
Rosaceae 491, 751, 763, 1033, 1039, 1329
Rubiaceae 63, 191, 251, 375, 1241, 1363, 1483
furanone, iridoid and phenylpropanoid glycosides from 375
Rumex chalepensis, flavonoid glycosides and anthraquinone from 1211
Rutaceae 417, 723, 801, 1091, 1305, 1383, 1453

S
Salt stress, effect of, on polyamine metabolism in *Brassica* 283
Salvia aspera, diterpenoids from roots of 139
S. regla, diterpenes from 931
S. sahendica, sesterterpene from 715
Sapindaceae 1063
Saponins,
from *Pulsatilla* 937
molluscicidal, from *Catunaregam* 63
steroidal, inhibiting c-AMP phosphodiesterase, from *Dichelostemma* 1103
triterpenoid,
containing glucuronic acid, from *Aralia* root bark 179
from *Aster* 875
from *Hacquetia* 195
from *Mazus* 185
from *Mussaenda* 191
from *Phytolacca* 625
Sapotaceae 255
Schinus terebinthifolius, triterpenoid inhibitors of phospholipase A_2 from 637
Schisandraceae 1187
Schizolobium parahyba, chymotrypsin inhibitor from 521
Schkuria pinnata, sesquiterpene lactones from 127
Scrophulariaceae 185, 549, 925, 941, 1111, 1391
Secoiridoid glycosides, from *Gonocaryum* 115
Secoiridoids, from *Poraqueiba* 835
Semecarpus anacardium, phenolic glycoside from 405
Sesquiterpene dimers, from *Chloranthus* roots 121
Sesquiterpene lactone glycosides, from *Crepis* 1395
Sesquiterpene lactones,
elemandiolide, from *Zinnia* 1479
eudesmanolides, from *Melanoselinum* 1123
from *Antrodia* 613
from *Hymenoxys* 1127
from *Lychnophora* 387
from *Michelia* 839
from *Neurolaena* 133
from *Schkuria* 127
from *Urolepis* 795
in *Zaluzania*, on-line LC-NMR measurements of 609
melampolides, antifungal, from *Smallanthus* 845
resulting from interspecific hybridization in *Helianthus* 367

Sesquiterpenoid phytoalexins,
accumulation of, in lettuce seedlings with red spot disorder 775
in *Gossypium*,
biosynthesis of 553
enzymatic formation of 327
induction of by bacterial inoculation 531
Sesquiterpenoids,
eudesmane, rearranged,
from *Ocotea* 849
from *Poraqueiba* 835
from *Cryptomeria* leaves 603
from *Reboulia* 91
in *Lactarius* species, chemotaxonomic relevance of 363
longipinene, from *Stevia* 853
nor-, from *Teucrium* 617
patchoulane, from *Valeriana* 713
Sesterterpene, from *Salvia* 715
Shikimate pathway, in higher plants, molecular organization of 737
Simaroubaceae 911, 1403
Skeletonema costatum, lipid composition of 1017
Smallanthus sonchifolius, antifungal melampolide from 845
Solanaceae 57, 69, 277, 315, 977, 1245, 1475
Solanum robustum, steroid alkaloid glycosides from 1475
Sophora secundiflora, isoflavonoids from 907
S. tetraptera, isoflavonoids from 667
Spermidines, trisubstituted with hydroxycinnamic acids, from *Quercus* pollen 1371
Spodoptera litura, biotransformation of lignans by 1027
Stapelia variegata, pregnane glycosides from 395
Starch phosphorylase, from *Cuscuta* filaments 1001
Stellaria media, lipids from 709
Steroidal glycosides, from *Cynanchum* 199
Steroids,
from *Ailanthus* gum resin 1403
3,14-seco-16,24-cyclo-, from *Physalis* 1245
Sterol composition,
in *Trigonella*, effect of diniconazole on 883
of algae from Qatar 373
of triadimenol-sensitive and resistant *Uncinula* strains 293
Sterol, *seco*-cycloartane, from *Tillandsia* 665
Stevia serrata, longipinenes from 853
S. subpubescens, *ent*-kaurane glycoside from 1133
Stilbene glycosides, from *Guibourtia* 895
Stilbenoids, from *Agrostophyllum* and *Coelogyne* 649
Stress metabolites, sulphur-containing, from Japanese radish 581
Strychnaceae 1377
Strychnos, polysaccharides from seeds of 1377
Styrylpyrone glucosides, from *Equisetum* 915
Sulphonylalkyl amine, from *Rorippa* 919
Sulphoquinovosyldiacylglycerol, biosynthesis of, by pea and lettuce chloroplasts 1071
Symphyogyna brasiliensis, labdane diterpene from 99

T
Tabernaemontana divaricata, terpenoid indole alkaloid biosynthesis in 341
Talaromyces tardifaciens, azaphilone from 719
Taxaceae 259, 869, 871, 935, 1147
Taxanes, from *Taxus* 869, 871, 935, 1147
Taxodiaceae 603
Taxus baccata, 4-(*p*-hydroxyphenyl)-(2*S*)-butanol from 259
T. wallichiana, taxanes from 869, 935
T. yunnanensis, taxanes from 871, 1147
Terpenoids, from *Ailanthus* gum resin 1403
Tetraphis pellucida, coumarins from 379
Tetronic acids, from *Fusicoccum*, biosynthesis of 1359
Teucrium heterophyllum, nor-sesquiterpenes from 617
Thalictrum simplex, epimeric pavine *N*-oxides from 683
Thiolactomycin, effect of on fatty acid synthesis in peas 511
Thomandersia laurifolia, 2-indolinone alkaloids from 1249
Ti(IV), effect of on Fe activity in *Capsicum* 977
Tigloyl-CoA:pseudotropine acyl transferase, from *Datura* 315
Tillandsia usneoides, *seco*-cycloartane from 665
Tinospora cordifolia, norditerpene furan glycosides from 1139
Trichilia rubra, limonoids from 621
Triflavonoid,
from *Bartramia* 465
from dragon's blood 949
Trigonella foenum-graecum, effect of diniconazole on sterol composition of 883
Trigonelline, as leaf-closing factor in *Aeschynomene* 817
Tripterigium wilfordii,
sesquiterpene alkaloids from 1219
triterpenoids from 1153, 1159
Triterpenoid
diglucoside, from *Enterospermum* 251
ester, oleanane, from *Frullania* 99
glycosides,
dammarane, from *Neoalsomitra* 591
from *Adina* 1241
from *Anemoclema* 1175
from *Cephalaria* 1171
methyl ethers, from Palmae epicuticular waxes 1381
Triterpenoids,
dammarane,
from *Boronia* 801
from *Cleome* 175
from *Boswellia* gum resin 453
from *Poria* surface layer 1165
from *Schinus*, as competitive inhibitors of secreted phospholipase A_2 537
from *Tripterigium* 1153, 1159
from *Walsura* 167
lupene, from *Mimusops* 255
pentacyclic, cytotoxic, from *Nerium* 171
Triticum aestivum,
3,4-dichloroaniline *N*-glucosyl- and *N*-malonyltransferase activities in 81
effect of crop development on biogenic emissions from 1351
ent-kaurene accumulation in paclobutrazol-treated seedlings of 11
Tylophora tanakae, phenanthroindolizidine alkaloids from 695

U
UDP-sugar metabolism, during differentiation of french bean 21
Umbelliferae 33, 195, 515, 1099, 1123, 1347
Uncinula necator, sterol composition of strains of 293
Urolepis hecatantha, sesquiterpene lactones and labdane from 795

V
Valeriana fauriei, patchoulane sesquiterpenoids from 713
Valerianaceae 713
Verbascosides, acetylated and methylated, from *Penstemon* 1391
Verbenaceae 829, 929
Verticillium biguttatum, antifungal hydroxymethyl-phenols from 1043
Vigna radiata, carnitine acyltransferase from 39
Vitaceae 293
Volatiles,
emitted from plant leaves after insect damage, biosynthesis of 785
from *Pinus* needles 357

W
Walsura piscidia, triterpenoids from 167

X
Xanthofusin, biosynthesis of, in *Fusicoccum* 1359
Xanthones,
from *Garcinia* pericarps 943
pentaoxygenated, from *Bredemeyera* 1433
prenylated, from *Garcinia* root bark 945
substituted, from *Hypericum* cell cultures 903
Xanthosine, and caffeine biosynthesis in *Coffea* 1363

Z
Zaluzania grayana, on-line LC-NMR of sesquiterpene lactones from 609
Zanthoxylum bungeanum, flavonol glucosides from 723
Z. schinifolium, coumarins and anti-platelet aggregation constituents from 1091
Zea mays, ammonium ion-dependent isomerization of glutamate dehydrogenase in 495
Zhumeria majdae, rearranged abietane diterpenes from 163
Zinc, effect of, on plant growth, free radicals and proline 45
Zingiber cassumunar, phenylbutenoid monomers from 459
Zingiberaceae 459
Zinnia citrea, elemandiolide from 1479
